PRATIKA **TECHNOLOGY AND INNOVATION MADE IN ITALY**

Dratika is a line of high-tech automatic safety, intuitive management, elegant and manufactured entirely in our factories the success of this line. in Italy. Reliability, versatility, productivity, A new approach to shrink wrapping.

Δ

wrapping machines designed and functional design: these are the keywords for

The Pratika range combines speed, accuracy and versatility of packaging. It's suitable for any type of product and for all production requirements.

PERFORMANCE

DESIGN AND

The design of an industrial machine cannot be an end in itself, it must be functional. From the control panel on the 180° rotating arm to the pull-out roll drawer, from the illuminated work area to the double doors - everything is designed to improve the quality of the operator's work.

RELIABILITY **AND QUALITY**

•

Over 40 years of experience, 300,000 machines installed worldwide, and a R&D Centre that focuses on continuous technological development. It's this expertise that goes into the Pratika line that best embodies Minipack[©]-Torre's quality and reliability.

EASY MANAGEMENT

Simple and intuitive graphic Touch Panels are supplied on all machines for enabling the operator to control the process with one finger. To enter the product parameters, set one of the 256 programs stored by the user, upload, download and transfer data via the integrated Ethernet and USB ports, and solve problems autonomously thanks to Troubleshooting or via the internet with the remote support box, examining the machine remotely from our Lab.

Because of their technological advances, our machines consume about 30% less power than the industry standard. For us, sustainability is important, so we orient research and development activities towards ensuring that the equipment used by our clients are the right combination of outstanding performance and lower power consumption.

PRE-SALES AND AFTER-SALES SERVICE

Everything comes from the personalised design of your system and continues with the total customisation of processing, service, pre-sales and after-sales service. We provide a worldwide service network. Free packaging trials complete our service.

SPEED

The Pratika* line is equipped with a Brushless motor that allows for faster movement of the sealing bar and a pressure that is 2 - 3 times higher than pneumatic models, with a movement time of less than a second.

SELF-MANAGEMENT

Thanks to its PLC management system and its various motorised adjustment functions, the Pratika** line can regulate itself based on the size of the product to be packaged (except for width) and based on set parameters: bar height, triangle height, centring of the seal, a choice of horizontal or vertical sensors, belt speed, ability to adapt to products of various sizes.

VERSATILITY

The versatility of the shrink wrap packaging enables a range of products in different shapes and sizes to be packed quickly, economically and safely. That's why Pratika wrapping machines are ideal for the needs of different sectors: food, cosmetics, industrial, graphic, laundry, wood industry, bakery, fruit & veg, logistics, IT, sport..

FULL ELECTRIC SORRY, I DON'I

The Pratika* range brings a new approach to shrink wrapping - to be fully electric. Thanks to t Brushless motor there's no need for compress air, providing great advantages by eliminati the compressor: more speed, more pressure more control, less noise, less power consumption fewer installation problems.

Schneider Gelectric **A HIGH PROFILE** PARTNER

MINIPACK[®]-TORRE has chosen SCHNEIDER **ELECTRIC** as its global partner for the electrical and electronic components of our automatic machines.

SCHNEIDER ELECTRIC's international status is a guarantee of reliability. MINIPACK[®]-TORRE costumers know they can always count on our reliable and technologically up to date products, together with a widespread and efficient service support across the five continents which reduce time and service costs.

PRATIKA 55 SMART **THE AUTOMATIC COMPACT SHRINK WRAPPING MACHINE** WITH BUILT-IN TUNNEL

ATTENTION TO SAFETY

The new automatic shrink wrapping model **PRATIKA 55 SMART** has been created through paying meticulous attention to market needs, with the aim of proposing a technologically advanced but flexible and extremely compact product. The built-in tunnel, revolutionary in the world of automatic machinery, meets space requirements and reduces labour costs to a minimum, thanks to its patented "come back" option for a single operator.

Enhanced by strong mechanical and electronic technology, the new PRATIKA 55 SMART represents a perfect combination of reliability, versatility and safety, and provides a further evolution in automatically operated, compact shrink wrapping machines.

- L-seal blade

0

- Seal bar height adjustable to the mm via the touchscreen control panel
- Adjustable seal time and seal temperature
- Adjustable seal pressure (min/med/max)

PRATIKA 55 smart

EXCELLENT PRODUCTIVITY

- High seal speed and productivity
- Electronically adjustable transport belt speed (optional)
- Ability to wrap individual packs or groups of products

MAXIMUM FUNCTIONALITY

- Roll insertion at the top of the unit with sliding drawer device for ease of insertion
- Horizontal sensors to read product (vertical sensors optional)
- Daily or part-day electronic cycle counter and lifetime item counter

NEW

· General automatic control available right from ignition

• The machine can be on wheels • The machine's doors can be opened 180° to ensure easy access and operation • Simple, intuitive operator graphics

PRATIKA 56 MPE REVERSE **A PERFECT SYNTHESIS OF RELIABILITY, SPEED AND FLEXIBILITY**

- - belt and roll support

PRATIKA 56 MPE REVERSE is a wrapping machine with double hatch.

The new **PRATIKA 56 MPE REVERSE** version arises from tireless attention to the needs of the market with the aim of offering a technologically advanced, yet flexible and "user-friendly" product.

Enhanced with strong technological, mechanical and electronic contents, the new PRATIKA 56 MPE REVERSE. suitable for operation on both sides thanks to its double hatch, represents a perfect synthesis of reliability, high performance, versatility and safety, by which the way of conceiving automatic packaging machines with heat-shrink film evolves one more time.

PLUS

"Center Sealing" adjustable sealing device setting via the touchscreen control panel

Control panel 180° adjustable

Integrated troubleshooting to make it easier to analyse machine faults and find solutions

PRATIKA 56 MPE REVERSE INOX **STEEL RESISTANCE AND DUAL FUNCTION**

PRATIKA 56 MPE REVERSE INOX is a steel wrapping machine.

An evolution of the PRATIKA 56 MPE model in the stainless steel variant, this model is intended for processing labs to package food or pharmaceutical products.

In terms of design, priority was assigned to practicality: along with the material specifically designed for the food industry, the double hatch allows for operation in both directions, from right to left and vice versa.

PRATIKA 56 MPE REVERSE INOX aims at meeting the needs of the market it is intended for as best as possible by offering high-tech and yet flexible solutions: everything is designed to achieve the highest speed and efficiency, with a huge benefit in terms of labour and packaging time.

PRATIKA 56 E 56 CS **TECHNOLOGY OF A LEADER AT THE RIGHT INVESTMENT**

PRATIKA 56 e PRATIKA 56 CS are a completely innovative automatic packaging machine, basic model of a MINIPACK®-**TORRE** product range which imposes a new standard comparing to similar machines.

High technological, mechanical and electronic components and granted reliability are the common features of a range of machines with specific packaging features: each one meets specific packaging needs. Both model are equipped with kissing belt as standard.

PRATIKA 56 CS allows to achieve a horizontal sealing exactly in the middle of the product (CS stands for CENTERSEALING) through the movement of the whole sealing head.

PRATIKA 56-T MPS **EXCEEDS ANY LENGTH AND SPEED LIMIT**

ATTENTION TO SAFETY

- belt and roll support
- Operator safety control logic
- Visible and acoustic machine stop alarm signal

PRATIKA 56-T MPS is an automatic packaging machine fitted with the Side Seal device, the continuous sealing with no limits in terms of length, as well as the Centre Sealing and fully electric operation.

The mechanical and electronic components of this machine, which is suitable for packaging formats up to 400 mm wide and 240 mm height, have been enhanced to reach an output of max 3,600 pcs/h (depending on the product size and film used).

Made on our new T bodywork, which includes a standalone electrical system located at the back of the machine.

PRATIKA 56-T MPS is a perfect synthesis of reliability, high performance, versatility and safety, thereby further developing the way of designing packaging machines with heat-shrink film.

PLUS

Pratika 56 / 56 CS Pratika 56 MPE Pratika 56-T MPS Pratika 80-T MPS

KR230214

REMOTE SUPPORT BOX

KR230216

INTEGRATED REMOTE SUPPORT BOX

This device allows assistance to be provided remotely to all electronic equipment (PLC, HMI, inverters, drives) installed on the machine. It is possible to install it inside the machine (KR230216).

ADVANTAGES

Connected to the machine and to the "Help Centre" in our headquarters in Dalmine (Italy), the device can provide us with diagnostic information and enable us to take the appropriate action.

OPTIONAL ON THE FOLLOWING MODELS

Pratika 56 / 56 CS · Pratika 56 MPE Pratika 56-T MPS · Pratika 80-T MPS

For this option to function correctly, we also recommend the purchase of the 3G UMTS dongle.

FE124002

3G UMTS DONGLE

This ensures that the remote support box functions correctly.

OPTIONAL ON THE FOLLOWING MODELS

Pratika 56 / 56 CS Pratika 56 MPE Pratika 56-T MPS Pratika 80-T MPS

KR230225

ELECTRIC HOLE-PUNCH KIT

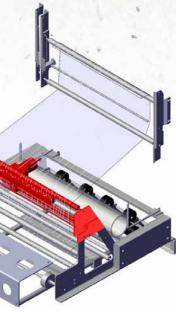

This can be used in alternative to the standard micro-hole-punches, for wrapping that must not be exposed to external contamination, or it can be used in addition to the standard micro-holepunches, where products have particular wrapping requirements.

ADVANTAGES

It is particularly suitable for wrapping that requires a large amount of air to be extracted.

OPTIONAL ON THE FOLLOWING MODELS

Pratika 56 / 56 CS Pratika 56 MPE Pratika 56-T MPS KR230223 Pratika 80-T MPS KR390012

KR210068

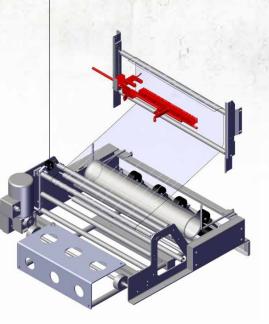

PNEUMATIC HOLE-PUNCH KIT

This can be used in alternative to the standard micro-hole-punches, for wrapping that must not be exposed to external contamination, or it can be used in addition to the standard micro-holepunches, where products have particular wrapping requirements.

ADVANTAGES

It is particularly suitable for wrapping that requires a large amount of air to be extracted.

OPTIONAL ON THE FOLLOWING MODELS Pratika 56 / 56 CS

KR230310

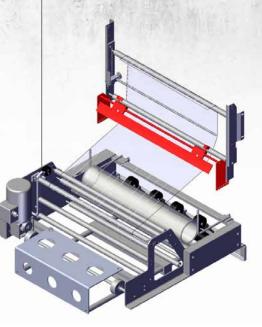

ANTISTATIC BRUSH KIT

Consisting of a carbon fibre antistatic brush, it is mounted in a way that, by lightly brushing the film during the machine's action eliminates the electrostatic charge present on the surface of the film.

ADVANTAGES

It is particularly suitable for working with materials that are susceptible to a high level of static.

OPTIONAL ON THE FOLLOWING MODELS Pratika 56 / 56 CS Pratika 56 MPE

KR210109

PRESSER KIT

Fitted to the sealing frame, this allows the amount of air remaining inside the wrapping after sealing to be kept to a minimum.

The pressing surface is 300x200 mm in size, covered with foam rubber, and it presses on the package shortly before sealing, forcing the air from the package.

ADVANTAGES

This is especially recommended where only one package is to be made without shrink wrapping or where light and delicate products are to be shrink wrapped.

OPTIONAL ON THE FOLLOWING MODELS

Pratika 56 / 56 CS Pratika 56 MPE

KR210055

LIQUID REMOVAL BRUSH KIT FOR BELTS

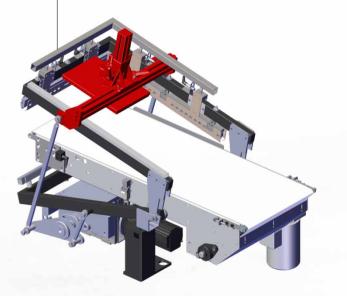

Fitted to the frame of the input belt, this ensures that liquid residue deposited on the belt by products passing over it is constantly cleared.

ADVANTAGES It is recommended for working with food products

that have no primary wrapping or with oily products.

OPTIONAL ON THE FOLLOWING MODELS

Pratika 56 / 56 CS Pratika 56 MPE Pratika 80-T MPS KR390015

KR210076

UNSTABLE PRODUCTS RAIL KIT

This kit consists of a rail system fitted on the input and output belts. The kit's side profiles ensure correct positioning of the products and improved stability during movement.

ADVANTAGES

It is especially recommended where unstable products are to be wrapped.

OPTIONAL ON THE FOLLOWING MODELS

Pratika 56 / 56 CS Pratika 56 MPE

If this option is chosen, we also recommend that it is combined with the unstable products rail kit for the tunnel.

KR210104

RAIL KIT WITH LIGHT SENSOR

This is particularly suitable for working with nontransparent film where the standard light sensor would read continuously. The distinctive traits of this light sensor make it suitable for wrapping very shallow products.

ADVANTAGES

Ideal for wrapping shallow products or if using non-transparent film.

OPTIONAL ON THE FOLLOWING MODELS

Pratika 56 / 56 CS Pratika 56 MPE Pratika 56-T MPS KR230231

KR210106

LIGHT SENSOR KITS FOR TRANSPARENT PRODUCTS

Comprising a light sensor and a reflector, thanks to its wider range, it can detect the passage of even semitransparent products.

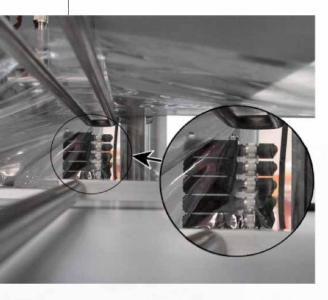

OPTIONAL ON THE FOLLOWING MODELS Pratika 56 / 56 CS Pratika 56 MPE

KR210080 LIGHT SENSOR KITS

FOR IRREGULAR SHAPED PRODUCTS

Comprising 5 receivers and 2 transmitters, this is particularly recommended for wrapping products that are irregular in shape.

OPTIONAL ON THE FOLLOWING MODELS Pratika 56 / 56 CS Pratika 56 MPE

KR210094

NON-TRANSPARENT FILM LIGHT SENSOR KIT

Composed of a light sensor plus reflector, this is necessary when working with non-transparent film, where the standard light sensor would read continuously.

OPTIONAL ON THE FOLLOWING MODELS

Pratika 56 / 56 CS Pratika 56 MPE

KR210072

PRODUCT ENTRY DETECTION LIGHT SENSOR KIT

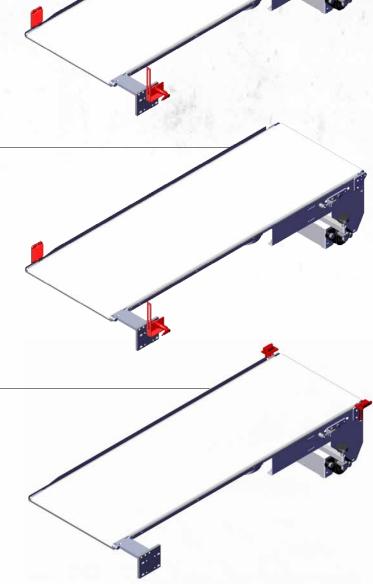

Kit consisting of a light sensor with emitter and receiver, it starts the machine's cycle only when it detects that the product is present.

ADVANTAGES

It is especially useful where the production rate isn't particularly high and allows for energy savings.

OPTIONAL ON THE FOLLOWING MODELS

Pratika 56 / 56 CS Pratika 56 MPE

KR210069 · KR230221 · KR390003

PRINTED FILM LIGHT SENSOR KIT

26.5

Comprising a special light sensor that reads the indents printed on the film, it is necessary where printed film is used and the print must be placed in a precise location on the wrapped product.

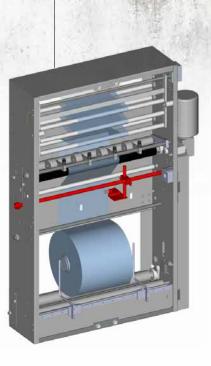

OPTIONAL ON THE FOLLOWING MODELS

KR210069 Pratika 56 / 56 CS Pratika 56 MPE

OPTIONAL ON THE FOLLOWING MODELS

KR230221 Pratika 56-T MPS KR390003 Pratika 80-T MPS

KR210070 · KR230232 · KR390001

"END OF ROLL" LIGHT SENSOR KITS

It is equipped with a light sensor that detects if the passage of the film is interrupted. An alarm appears on the Touch Screen to indicate that the film roll is empty.

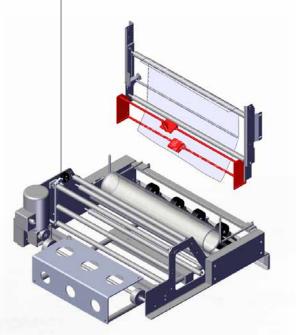

ADVANTAGES

If the Pratika wrapping machine is fitted with this device, it can be linked to other machines further up the production line to stop the arrival of products to be wrapped until the film roll is changed.

OPTIONAL ON THE FOLLOWING MODELS

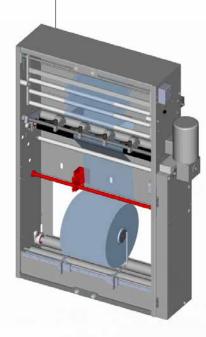

KR210070 Pratika 56 / 56 CS Pratika 56 MPE

Fitted on top of the "deviafilm rolls"

OPTIONAL ON THE FOLLOWING MODELS

KR230232 Pratika 56-T MPS KR390001 Pratika 80-T MPS

KR210071 · KR390002

12.5

"END OF ROLL" LIGHT SENSOR KITS

Consisting of a light sensor + reflector, it sends a warning via an alarm to the Touch Screen and a yellow light on the light tower, when the film roll is running out.

ADVANTAGES

It is very useful to optimise the timing of a roll changeover. Between the time of the Touch Screen warning and the film roll actually running out, the operator has time to retrieve a new roll.

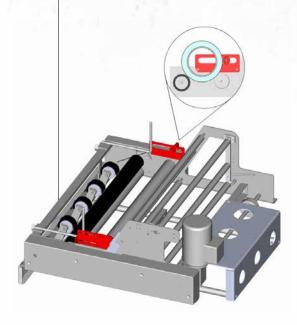

OPTIONAL ON THE FOLLOWING MODELS

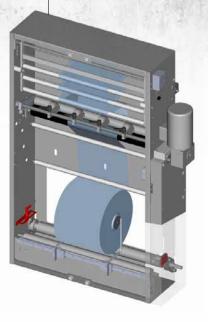

KR210071 Pratika 56 / 56 CS Pratika 56 MPE

Fitted on top of the "unwinder" group

TURNEL FLEXIBLE AND UPDATED SOLUTIONS TO GET THE BEST PACKAGING

The **TUNNEL 50, 50 TWIN** and **70** has been designed to be perfectly integrated with the Pratika automatic packaging machines. They solve the needs to pack the products with great technical and esthetical results. The technical and aesthetic updates can meet a number of packaging needs in a flexible and effective manner with a wide variety of heat-shrink films.

The INOX versions are ideal for the needs of the food-processing and pharmaceutical sector.

UNNEL 50 TWIN INOX

TUNNEL 50 TWIN GT **INNOVATION OPTIMIZES THE PROCESS**

The **TUNNEL 50 TWIN GT** has been designed to be perfectly integrated with the Pratika automatic packaging machines. Thanks to the electrical and electronic components of Schneider Electric it is finally possible to check any aspect of retraction. Connecting the tunnel to a Pratika automatic packaging machine it will be possible to have all the parameter checked directly from the touch screen of the machine.

The double heating room with separated regolation, fans speed and temperature control, the exceptional termic insulation, the high passage and retraction speed, make this Tunnel the ideal machine to solve every packaging need with great effectiveness. The new plastic conveyor belt, ideal for high temperature, guarentees more stability to products and less wear.

TECHNICAL FEATURES

New control logic managed by PLC TM221 Schneider Electric with 9 customizable programs, 256 if connected to Pratika packaging machine 4.3-inch colour touchscreen console Product conveyor Adjustable double air baffles Auto-off program Outfeed roller conveyor provided as standard Two independent heating rooms

Internal lighting for an ideal and safe vision

Transparent glass control window (world patent) Patent

Second inverter for motor fan speed regolation

ninipack

Tunnel 50 Twin GT

- 4.3-inch colour touchscreen console
- Internal lighting for an ideal and safe vision
- Transparent glass control window (world patent) Patent
- Adjustable double air baffles
- Two independent heating rooms
- Conveyor belt in hi-tech plastic material
- Second inverter for motor fan speed regolation
- Bump on the conveyor belt manually adjustable

PERFECT INTERFACEABILITY

· Interface with Ethernet cable with the programs of every model of Pratika range; this allows to set up all the parameters (temperature, conveyor speed, fan speed) from the program that is showed on the NEW

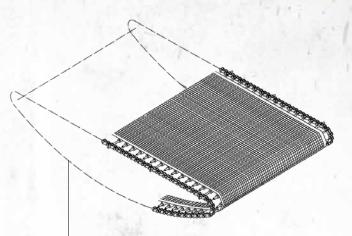

TUNNEL OPTIONALS

KR250012

TUNNEL 50 TWIN GT PRODUCT RAIL KIT

Fixed to the tunnel's conveyor belt, this is the ideal solution for wrapping products that are unstable or irregular in shape. The 2 adjustable side rails allow it to hold products with a maximum width of 430 mm.

OPTIONAL ON THE FOLLOWING MODELS Tunnel 50 Twin GT

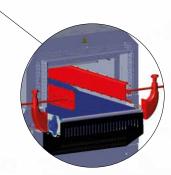

FM710010 • FM710012 • FM710015

PTFE BELT

Suitable when working with very small products that might get stuck in the film roll and for working with polyethylene material at high temperatures.

OPTIONAL ON THE FOLLOWING MODELS FM710010 Tunnel 50 FM710012 Tunnel 70 FM710015 Tunnel 50 Twin

KR250009

TUNNEL 50 TWIN GT HEIGHT ADJUSTMENT KIT

Comprising 4 supports fixed to the bodywork, it allows the height of the conveyor belt to be adjusted according to the input or output machine's working surface height.

> Min 770 mm Max 1050 mm

OPTIONAL ON THE FOLLOWING MODELS Tunnel 50 Twin GT

RU140001

ROLLER TABLE 70 X 100

Unloading roller table for use where there is no automated line continuation after products leave the tunnel.

ADVANTAGES

Ideal for working with small products thanks to the number of rollers being doubled.

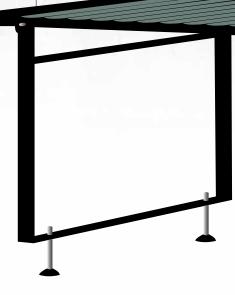

OPTIONAL ON THE FOLLOWING MODELS Tunnel 70

RU020004

ROLLER TABLE 40 X 100

Unloading roller table with 15° incline. Length: 1 mt.

OPTIONAL ON THE FOLLOWING MODELS Tunnel 50 / 50 Twin

BELTS EFFICIENCY, RELIABILITY AND HIGH PERFORMANCE

MINIPACK®-TORRE to complete its product range, offers a complete line of motorised belts that can be used and interfaced to our packaging machines, offering a precious complement to products conveyor automation.

Entirely designed by our Lab, they offer efficiency, reliability and high performance. MINIPACK®-**TORRE** motorised belts can be combined into existing production lines.
